Calculating your "UC Score" for the UC Eligibility Index

SAT Reasoning Test: UC Score Total = Critical Reading + Math + Writing + Subject Test 1 + Subject Test 2

ACT Plus Writing: UC Score Total = (Math + Reading + Science) x 0.667 + English/writing + Subject Test 1 + Subject Test 2

UC Score Calculator: universityofcalifornia.edu/admissions/scholarshipreq

Application filing period *Fall quarter:* November 1–30

Applying for admission

Apply to UC Santa Cruz by completing the UC application: universityofcalifornia.edu/apply.

The online application explains the filing process and instructions for submitting your application. If you require a paper application, you may e-mail the UC Application Processing Service at ucinfo@ucapplication.net. In the e-mail, be sure to mention that you are a freshman applicant and state the reason why you cannot apply online.

Admission to majors in the Jack Baskin School of Engineering

While all freshman applicants are considered for admission to the UC Santa Cruz campus under the selection criteria previously described, acceptance into an engineering major is based on high school grade point average, courses completed in mathematics and sciences, scores on standardized tests, and/or the personal statement. Details on the admission process for the Jack Baskin School of Engineering can be found at soe.ucsc.edu/admissions.

Admission by Exception

Admission by Exception is granted to a very small percentage of applicants who do not meet UC-eligibility requirements. Such factors as academic accomplishments in light of your life experiences and/or special circumstances, socioeconomic background, special talents and/or achievements, contributions to the community, and the quality of your personal statement are taken into consideration.

Financial aid and scholarships

If you are concerned about your ability to meet educational costs, you should file the Free Application for Federal Student Aid (FAFSA). You can download the form, or file electronically by visiting fafsa.ed.gov (UCSC School Code for FAFSA: 001321).

Campus tours

Student-led campus tours are offered year-round on weekdays and selected Saturdays. Reservations are required and may be made online at admissions.ucsc.edu/campustours.

Admission & Selection

The selection process for first-year students at UC Santa Cruz requires that you have the rigorous academic preparation needed for admission to a major research institution. Admission to UCSC involves two parts: eligibility to the University of California and selection by UC Santa Cruz. Meeting minimum eligibility requirements does not guarantee selection to UC Santa Cruz, and many UC-eligible students are not selected for admission to the campus. Students are encouraged to achieve well beyond the minimum eligibility requirements to enhance their chances for selection.

Eligibility for Admission

Currently, there are three ways to establish eligibility for admission to the University of California. First, students can achieve “eligibility in the statewide context.” Second, students ranking in the top 4 percent of their class in participating high schools may gain admission through what is called “eligibility in the local context.” Finally, students with very high test scores may be eligible by examination alone. You can find more detailed information by visiting: universityofcalifornia.edu/admissions/freshman.

Eligibility in the statewide context

To achieve eligibility, students must take some standardized tests and must achieve a minimum GPA (3.00 for state residents; 3.40 for non-state residents) in their

college-preparatory classes known as the “a–g” courses.

> More specifically, you need:

- History/Social Science, two years
- English, four years
- Mathematics, three years (four years recommended)
- Laboratory Science, two years (three years recommended)
- Language Other than English, two years in one language other than English (three years recommended)
- Visual and Performing Arts (VPA), one year
- College Preparatory Electives, one year

If you attend an accredited high school in California, you can check the courses at your school that may

satisfy the “a–g” pattern by consulting ucop.edu/doorways. The web site also has general information for applicants who do not attend an accredited California high school.

> Establish an acceptable grade-point average (GPA).

- *California resident minimum GPA: 3.00*
- *Nonresident minimum GPA: 3.40*

The GPA is only calculated on courses meeting the “a–g” requirements in the 10th, the 11th, and, if completed, the 12th grade. See the UC Eligibility Index chart on the back cover for further information.

> You must also complete the examination process.

By December of your senior year at the latest, you must take either the ACT or SAT exams. Specifically:

1. *The ACT Assessment plus Writing or the SAT Reasoning Test.* The scores you report for each section of the SAT

(critical reading, mathematics, and writing) must be from the same sitting. UCSC Code for ACT: 0460. UCSC Code for SAT: 4860.

2. *Two SAT Subject Tests in two different subject areas.*

Choose from history, literature, mathematics (Level 2 only), science, or language other than English.

Eligibility in the local context California residents only

If the university determines that you are in the top 4 percent of your high school class by the end of your junior year, then you will be notified at the beginning of your senior year that you have achieved ELC status—eligibility in the local context. To remain eligible, you then need to apply to the UC in November and complete the Examination Requirement and the remaining courses in the Subject Requirement.

Performance in academic subject areas

Students who have demonstrated outstanding performance in one or more of the “a–g” subject areas may be awarded up to 100 points by the faculty. Top academic performance sustained throughout a student’s high school career will receive consideration in this area.

Achievements in special projects

The faculty wishes to acknowledge achievement in special projects by awarding up to 100 points. Students will be reviewed for outstanding or exceptional achievement in one or more special projects related to an academic field of study, not necessarily confined to the “a–g” subject areas. Programs and/or projects outside the classroom in the “a–g” subject areas will also be considered under this criterion.

Improvement in academic performance

The faculty will award up to 100 points for recent improvement in academic performance. Students showing improvement in grades from their sophomore year to their junior year by at least one full grade point will be given consideration in this area. Only courses in the “a–g” subject areas will be calculated for this purpose.

Special talents, achievements, and awards

The faculty values students who have shown the promise to contribute to the intellectual vitality of the campus and

Eligibility by examination alone

You must satisfy the same examination requirement as described in “Eligibility in the Statewide Context,” above, but your test score total must meet a specific threshold. To qualify this way, you must achieve a minimum UC Score Total—calculated according to the Eligibility Index instructions—of 410 (425 for nonresidents). In addition, you must earn a minimum UC Score of 63 on each component of the ACT or SAT Reasoning Test and on each SAT Subject Test.

You may not use an SAT Subject Test to meet these requirements if you have completed a transferable college course in that subject with a grade of C or better.

As a selective campus, UC Santa Cruz is unable to offer admission to all UC-eligible applicants. UCSC offers admission to freshman applicants according to the selection policy described below.

will consider awarding up to 200 points in this area.

Students who have earned significant recognition at the state, national, or international level in a particular field, such as visual and performing arts, written communication, student government, athletics, or community service, or who have demonstrated exceptional leadership potential, will be considered under this criterion.

Participation in educational preparation programs

The faculty supports the efforts of many precollegiate educational programs and the students whom those programs serve. Up to 200 points may be awarded for those students who have participated and persisted in certain Educational Preparation Programs, and for those students who have demonstrated academic accomplishment within those programs. (Refer to the list on page 12 of the University of California application.)

Academic accomplishment within life experiences

The faculty will award up to 500 points for those students who have demonstrated academic achievement while also having dealt with significant life issues. Life experiences include but are not limited to disability, low family income, first generation to attend college, need to work, and other special circumstances.

Changes to eligibility requirements, effective fall 2012

Beginning with freshmen entering the UC system in fall 2012, eligibility requirements will change. The same number of “a–g” courses and the same GPA will be required. However, you will need to complete 11 of the 15 “a–g” courses by the end of your junior year. Also, SAT Subject Tests will no longer be required for admission, although you may still submit these scores for consideration as part of your application, as with AP scores. The Subject Tests may also be recommended for certain majors.

Will McIntyre, music major
HOMETOWN: *Hamilton, Massachusetts*
HIGH SCHOOL: *Hamilton Wenham Regional HS*

Geographic location

The faculty wishes to promote geographic diversity within the student body and will award up to 100 points to help achieve that diversity. Certain geographic regions where applicants live or attend school will be considered under this criterion. (400 point maximum between this criterion and the criterion “Academic Opportunities in California High Schools,” above.)

Selection Policy for UC Santa Cruz

The faculty of the University of California, Santa Cruz, wishes to articulate the freshman selection policy it will use for the fall 2010 quarter. Listed below are the 14 UC-approved criteria that a campus may consider in selecting students for admission.

UC Santa Cruz will calculate a score for each freshman applicant. For each of the 14 criteria, a specific point total is noted. A total of 9,200 points is possible. The higher the score, the more likely the student is to be admitted to UCSC.

Grade-point average (GPA)

Recognizing the connection between university success and high school GPA, the faculty will award up to 4,400 points in this area. The GPA is calculated on all “a–g” courses taken in the 10th and 11th grades, with an extra grade point awarded for an approved honors course in which a grade of C or higher is earned. The maximum GPA computed is 4.40.

Test scores

The UC-required examinations are a strong predictor of university success. The faculty will award up to 2,400

points from the following: the best score from the ACT plus Writing or the SAT Reasoning Test (single sitting), and two SAT Subject Tests in two different areas chosen from the following: history, literature, mathematics (Level 2 only), science, or language other than English.

Courses completed/planned

The faculty values students who have challenged themselves by taking more than the minimum subject requirements and will award up to 200 points in this area. Courses meeting UC’s “a–g” requirements will be considered, including those in mathematics and languages other than English taken during seventh and/or eighth grades.

Honors courses

Students who have taken or plan to take more rigorous senior-year course work, as defined by a UC-honors designation, will be awarded up to 200 points by the faculty. Courses approved for UC-honors include Advanced Placement, International Baccalaureate, UC-transferable college courses, and UC-approved honors courses (California high schools only).

Eligibility in the local context

The faculty wishes to reward top academic excellence of California students who are identified as ELC by awarding them 200 points.

These students are evaluated in the summer before their senior year and are determined by UC to be in the top 4 percent of their high school class.

Quality of senior-year program of study

The quality of the senior-year program is of utmost importance to the faculty, and students may be awarded up to 200 points for their senior-year program of study. The total number of courses planned, as well as the number of honors courses planned, is taken into consideration. (Refer to previous criterion, “Honors Courses,” above.)

Academic opportunities in California high schools

The faculty understands that not all high schools in California can offer students the same academic opportunities and will award up to 400 points for those students attending lower-performing California high schools as measured by the state’s Academic Performance Index (API). (400 point maximum between this criterion and the last criterion, “Geographic Location,” below.)
